

General Refurbishment

General refurbishment projects, which involve a number of different specialist repair techniques constitute one of Quadriga's main project activities.

Quadriga is often involved in large general refurbishment projects to high profile buildings, many of which require complete restoration, from demolition and strip-out, through to re-roofing and redecoration.

Quadriga's experience in dealing with historic buildings also stands us in good stead when working on projects involving listed buildings, where restrictions often affect the number of repair options available.

Previous contracts we have undertaken include the following:

- Manchester Airport Building 308
- NCP Offices Arndale Centre, Manchester
- Churchgate House, Manchester
- Victoria Station, Manchester
- Stockport Indoor Market
- The Royal Liver Building

Restoring A Past. . . Preserving A Future...
